Database Management (Info. Mgt.)

BCS211L-OCb/ACT211L-OAa

3 Units / 5hrs.

(2 Hours Lecture; 3 Hours Lab)

1st Sem, A/Y 2025-26

For 2nd Year Students

Course Description

This course focuses on the fundamental concepts, design, and implementation of databases as well as the use of database management systems.

Discussions and activities in this course involve topics about data modeling, relational schema and Structured Query Language (SQL).

The main goal of this course is to let students develop and submit an application supported by a database and utilizing a database management system.

Course Outcomes

After completion of the course, the student should be able to:

1. Apply the fundamental concepts of databases and database systems.
2. Design correct data model out of identified business rules and properly transform it to its equivalent relational schema.
3. Build an application that uses a database and a database management system.

Relational Schema

Course Coverage

PRELIM

- INTRODUCTION TO DATABASE AND DBMS
- DATABASE DEVELOPMENT PROCESS
- ENTERPRISE MODELING

Course Coverage

MIDTERM

- CONCEPTUAL DATA MODELING
- LOGICAL DATABASE DESIGN
- PHYSICAL DATABASE DESIGN

Course Coverage

SEMIS-FINALS

- STRUCTURED QUERY LANGUAGE (SQL)
- Intermediate SQL
- Development of a Database-Driven Application

PROJECTS

PRE-FINAL ASSESSMENT

- Documentation and Presentation of ER Model and Prototype Designs of proposed Program Project Solution

FINAL ASSESSMENT

- Finalization and Presentation of Program/Project Solution w/ Source Code

ONLINE CLASSES

- can stay at Home or anywhere with INTERNET CONNECTION
- If you prefer to be in the campus, stay at the designated rooms so you can have the device and internet

ATTENDANCE will be strictly monitored.

- Only 20% of the Total Class Hours (Excused/Unexcused absences) is allowed
- Make it a habit to report to class on-time, whether it is online or F2F.

JOIN GOOGLE CLASSROOM

- Stay updated from the announcements of your teachers

Email: jake.deguzman@unc.edu.ph

Study Groups

- The class shall be organized into small study groups in order to facilitate learning and collaboration.
 - Maximum of three (3-5) members in each study group.
 - Help one another in accomplishing the outputs.
 - Monitor and report progress to instructor.
 - Group is to be announced once final class list is available.
-

Software

- Diagramming Software
 - DIA Software
 - Draw.io
- Database Management and SQL Editor
 - MySQL Workbench

Task for Today

- Watch in advance the video lesson posted in google classroom about Introduction to Database Management Systems.
- Answer Discussion Board No. 1.
- Class interaction and short quiz shall be given next meeting.
